SUMMARY OF QUALIFICATIONS

Data Engineer with 3+ years of experience building and optimizing ETL pipelines in healthcare, finance, and higher education. Adept at leveraging SQL, Python, dbt, Spark, Cloud platforms (Snowflake, AWS, GCP, Azure), and LLM-driven automation to streamline enterprise workflows, enhance data quality, and drive operational efficiency.

TECHNICAL SKILLS

- **Programming Languages:** SQL, Python, PySpark, Scala, C#, R, Shell Script
- **Databases & Warehouses:** Snowflake, MySQL, PostgreSQL, PL/SQL, BigQuery, Redshift
- **Data Tools:** Airflow, dbt, Spark, Fivetran, Kafka, Pentaho, Hadoop, Pandas, NumPy, Tableau, Power BI
- **AI & ML:** LangChain, RAG, PyTorch, scikit-learn, Claude Code, OpenCode, Hermes agent, LLM Workflows
- **Cloud & DevOps:** AWS (EC2, S3), GCP, Azure, Databricks, Docker, Git, CI/CD
- **Frameworks & Tools:** Django, Pentaho, Jira, Postman, REST API, ETL/ELT

WORK EXPERIENCE

Data Integration Engineer Intern | BI Unit | Miami University IT Services | Oxford, OH Jun 2025 – Present

- Analyzed OAS (Oracle Analytic Server) usage data to extract key migration insights, supporting the university's transition to a modern analytics platform.
- Automated a critical daily reporting process by migrating Python Scripts from an unreliable local scheduler to a robust, serverless GCP pipeline (Cloud Run, Cloud Scheduler), eliminating manual intervention and resolving failures caused by system availability.
- Enhanced the GCP pipeline with AI-powered Slack alerting that summarizes failures and enables one-click retries, slashing MTTR by 95%.

Data Engineer | Infinite Computer Solutions (formerly Cotiviti) | Kathmandu, Nepal Apr 2024 – Jul 2024

- Automated 5 healthcare data pipelines using Shell Scripts and PL/SQL, reducing manual processing time by 25%.
- Validated and integrated public/private data sources into analytics pipelines using SQL-based quality checks in Postgres, ensuring 99.8% accuracy for US healthcare clients.

Data Engineer | ExtensoData, F1Soft Group | Kathmandu, Nepal Jan 2022 – Apr 2024

- Built scalable ETL pipelines with Apache Spark and Apache Airflow, streamlining data operations across 30+ financial institutions and improving processing speed by 40%.
- Owned data quality monitoring for ETL pipelines processing 10M+ daily records, maintaining a perfect zero-critical-incident track record across my entire tenure.
- Collaborated with data scientists to clean, structure, and transform transactional data, increasing ML model prediction accuracy by more than 20%.
- Led a team of 10 engineers in the transformation from a traditional stack (SQL, Pentaho) to a Big Data stack (Apache Spark, Airflow).

Software Engineer Intern and Trainee | Grafi Offshore | Kathmandu, Nepal Jun 2021 – Jan 2022

- Assisted the senior developers by supporting design, coding, testing, and fixing bugs in an ed-tech platform.

EDUCATION

Miami University | Master of Science in Computer Science | Oxford, OH Aug 2024 – July 2026

- GPA: 4.0 | Research: Machine Learning, LLMs, Knowledge Representation
- Graduate Assistant (August 2024 - May 2026)

Tribhuvan University | Bachelor of Science in Computer Science | Nov 2016 – Apr 2021

- Relevant Coursework: Algorithms, AI, Software Engineering, Computer Networks
